HOW TO PREVENT MOSQUITOS FROM BREEDING IN AND AROUND YOUR HOME:

- Change the water in flower vases and dog bowls at least once a week, pouring used water over the ground.
- Cover and seal all water containers to keep mosquitoes out.
- Pour out water from flower pots and replace with damp sand.
- Safely dispose of trash and unused containers and keep trash cans closed.
- Don’t leave objects that can accumulate water exposed.

IF THE MOSQUITO DOESN’T BITE YOU, BYE-BYE ZIKA!
